

This page is included as an explanation for how the applique and the embroidery fit

together.

This is a photo of Block 1a from the quilt. Notice how the leaves and flowers are extending into the basket. The embroidery for the leaves and flowers continues into the basket and actually outlines the edge of the applique. I used raw edge machine applique, but you may use hand applique if you choose. You will need to add a seam allowance if you plan to hand applique.

Below is the applique shape that you would use for piece #2 for the basket.

NOTE: Please re-read the "Reviewing the Process" section on page 6 of the pattern before you begin.
